Clearview Concrete Order Fulfillment System

A fast, efficient Order Fulfillment System is now a necessity in the fast-paced Ready Mix Industry. Accurate, clean and timely information at the fingertips of each division gives your company the ability to make more money off of each sale. Clearview Concrete was developed by ready-mix professionals to produce an all in one solution for companies to achieve maximum profit and less day to day hassles. It will take your company from being a reactionary workplace to building valued customer relationships and pulling each branch of your company together.

Ease of Use

A fully Windows-based system gives employees the needed speed and flexibility to handle more each day while still giving optimum customer service.

Maximum Profit

Many issues in ready-mix get patches of people or money to solve situations. Clearview changes all of this. Let your Order Fulfillment System work with you to solve problems. It will give your company tools to be leaner and more efficient.

Clean Integrations

This is not a complex issue. Clearview staff will work with your company to retrieve legacy information and integrate into the new environment.

Training and Support

Our staff is on call to assist. Speak with people that made the system. Current customers find our free web-conferencing partnership with Linktivity to be a huge resource for questions that arise. Clearview also monitors any discrepancies in day to day operations and reports them to your company and our support staff.
