Clearview Concrete

Clearview Concrete *Advanced* Order Fulfillment System

Advanced Mixes Module

Benefits for Business:

- ◆ Problem solves issues before they arise.
- ◆ Ensures best practices
- ◆ Happier customers
- ◆ Reduce size of mix library
- ◆ Reduce human involvement
- ◆ Deters operations deficiencies
- ◆ Less errors improves bottom line.

Clearview *Advanced*, Advanced Mixes

Another feature for advanced users shows the uniqueness of the Clearview system. Mix designs in essence are not very complex, however the distribution and usage requirements are another variant that makes the ready-mix industry unique. A mix design could require different water requirements just because of ambient air temperature. The Advanced Mixes module accounts for everyday occurrences like this.

Features:

- ◆ Substitutions - change a mix design component “on-the-fly” without creating a new mix design. An example of this is creating substitutes for tempered water in a mix design.
- ◆ Adders—a tool to alleviate pressure off of dispatchers and batchmen. The adder feature eliminates dispatcher or batchmen involvement in making minor modifications to a mix design. It is all sent up and recognized by the batch panel while batching. A good example of this is when a customer wants the same mix design, but needs non-chloride accelerator in morning loads and slowly reduce it for each load during the day.
- ◆ Exclusions—specifically developed to make sure certain admixtures are not used in certain applications. Also, a great warning mechanism for dispatchers to upsell other products.

Product: DARKGRAY * Description: DARK GRAY - DAVIS #8084

Escalation Schedule

Available for Resale Percentage Product (Dosed Product) Trim Type:

Mix UOM: Default Dosage Rate:

ID	*\$ UOM	Callout Offset	Send to Batch	Product Substitutions	Active	Modified On
000	LB		<input type="checkbox"/>	DARKGREEN	<input checked="" type="checkbox"/>	3/1/2007 2:34:48 P
					<input checked="" type="checkbox"/>	3/1/2007 2:34:48 P

The Product has the following warning:
Decreases setting time to unacceptable level.
