## Business Essential Reports

### Benefits for Business:

- ◆ Provide extensive feedback to senior management.
- ◆ Control and track expenses in your current budget.
- ◆ Clearly show Profit and Loss statements for each customer or project.
- ◆ Manage COD costs per day efficiently
- ◆ Problem solve issues before they become larger issues

### Clearview Business Essential Reports

Business Essential Reporting is just what it says, essential for companies to work in the ever increasing speed of business. The complexity of the what you get with these reports is unrivaled. A full range of capabilities will allow your company to easily manage day-to-day operations from dispatching, to plant, to driver specific information all within a click of your mouse.

**State of the Art Information**—TruckTrax has overhauled it's reporting platform to Microsoft SQL Reporting Services. This gives the user the ability to easily download reports into many customizable formats.

**Customizable Reports**—TruckTrax commitment to the Ready-Mix industry has resulted in industry specific reporting. Exacting details to keep your company ahead of its competitors.

**Web-Based Capability**—All reports can be accessed via the web or other online tools.

### Features:

**Next Day Summary** of Orders and Tickets for the Billing and Sales Departments. Instantly access any Order or Ticket with one click of the mouse. The time savings from going through different sets of screens and wasting time printing out copies can all be saved. The report details include mix details, associated product details, as well as surcharge details specific to that order or ticket. Explanations of how the pricing was placed in the system is also shown and available for potential audit review. The automated sort columns can be customized for individual users.

**Report Cash Flow** for from plant through to accounts receivable.

Sortable columns by customer, salesman, plant, etc.

Separate COD's and Customers account

**Standby, Lost Load Time Report**

Assess customers profitability for each load or order

**Other Reporting**

Batch weights, plant reporting, pricing reporting, etc.

The screenshots show various reports from the TruckTrax system. The top screenshot is a 'Void Tickets' report for 2/1/2009, listing customer information and order details. The middle screenshot is an 'Order Summary' report for 2/3/2009, showing a bar chart of order activity. The bottom screenshot is a 'Market Performance' report for 2/3/2009 to 2/6/2009, displaying a detailed table of performance metrics.
