

TRUCKTRAX

Clearview Concrete

Callout Scheduling Module

Benefits for Business:

- ◆ Increase profits by accurately scheduling each and every day.
- ◆ Curb losses by placing emphasis on schedulers responsibilities
- ◆ Drive customer results
- ◆ Accurately coordinate between divisions saving time and money
- ◆ Direct sales and operational efforts for given days.
- ◆ Decipher trouble loads or spots in next day scheduling
- ◆ Automate a once cumbersome process.
- ◆ Save money with accurate call-ins
- ◆ Save time from manually configuring next days orders
- ◆ Multi plant callouts, not once realized in other systems
- ◆ Continually updated route times

Clearview Advanced Callout Scheduling

Our customers have been able to use an automated Callout Schedule toolkit available for ClearView product suite. This toolkit provides a quick and painless way for dispatchers to create baseline schedules for plants or plant groups that work in concert. Schedules can be manually tuned as needed.

Features:

- ◆ Track driver absences and removal from schedule(s)
- ◆ Cross schedule loads and drivers from differing plants
- ◆ A schedule can be for single plant or span multiple plants
- ◆ Rebuild schedule "on-the-fly" up until the ticket is sent
- ◆ Ability to schedule beyond 1st round
- ◆ Easily configurable manually and automated.
- ◆ Auto add start up offset based on additional materials used in the load
- ◆ R7 & 8 rolling sum averages available during scheduling process Rounding function of start time to 5, 10, 15 minute intervals
- ◆ Limit earliest start time for senior drivers
- ◆ Auto alert when underlying order(s) schedule change AFTER the schedule is built Schedules can be rebuilt mid-day to determine need for additional drivers
- ◆ Drill in capability to underlying data (Driver records, Order Detail, etc.)
- ◆ Order of assignments to drivers can be by seniority, or by rotation numbers
- ◆ Intuitive design – Base schedules can be created in just a few seconds
- ◆ Ability to include/exclude HOLD or WILL CALL orders
- ◆ Work with PayTrax to automatically give driver times for the next day on their logouts.
- ◆ Publish option on Callout. Schedule in progress, publish for everyone to view and push over to time clocks. Will give them Time and Date for next days orders.

The screenshot shows the 'Clearview Callout Scheduling' window. At the top, it displays 'Schedule ID: 100104', 'Company: TRUCKTRAX INC.', 'Date: 4/29/2009 WED', and 'Day Begin Time: 4/28/2009 23:59'. The 'Plant/Plant Group' is set to 'TACOMA/DUPONT'. Below this are several buttons: 'Rebuild Sched', 'Auto Run' (checked), 'Copy Schedule', 'Order Plot', 'Round Times', and 'Order Sched'. There are also checkboxes for 'Hold' and 'Will Call'. The main area contains a table with two parts: 'Schedule' and 'Refresh Open Slots'.

R#	Seniority	Driver	Order #	Order's Batch Plant	Truck	Size	Def Truck	Truck Home
