- ◆ Track safety and environmental regulations

PayTrax Time Management System—Time Manager

Control Payroll's unnecessary costs.

Configure custom clock prompts that apply to your company's payroll needs. This solution will work with your current accounting system. It will process work orders and approval procedures with minimal human interaction. Assign languages to specific employees with the multilingual time clock interface. Maximize time clock control and flexibility with sophisticated ethernet time clock terminals.

Time Clock Service Controller (TCSC) is a secured web-based application over 30 clocks depending on locations. It is designed for optimum uptime. It is crucial to have a dependable system when dealing with employees personal records. Employees then establish trust in the system. TCSC constantly backs up any information sent to the PayTrax server so no data will be lost on either system.

One Step approval workbench for each manager. Managers are able to go into one page for different parts of the organization and approve employees time. When it comes to dependable and reliable way to monitor time clocks and payroll, TruckTrax has the answer.

Features:

- ◆ Secured Web-Based Application
- ◆ One-Step Approval Workbench
- ◆ Alerts to Management
- ◆ Accurate Real-Time Clock-in, Clock-out procedures
- ◆ Guest Pass monitoring
- ◆ Salaried Clock-in Clock out procedures
- ◆ Real-time Exception Reporting
- ◆ Acknowledged Requirement Approvals
- ◆ On-Site Population – real time employee count
- ◆ Employee Access – supports web based employee portals.
- ◆ Configured for optimum up-time
- ◆ Constant backup capabilities
